Mattia Crapanzano

IRATA Level 1 Rope Access Technician · Modulo A (Italy, Legislative Decree 81/08) · Volunteer Firefighter · First Responder
Born in Taranto (Italy) on 12/08/1996 · Based in Legnago (VR), Italy · +39 351 465 8810 · crapanzano.work@gmail.com · www.crapanzano.work · linkedin.com/in/mattia-crapanzano

01 ROPE ACCESS · WORK AT HEIGHT · RESCUE

At height.

IRATA Level 1 rope access technician, with the Italian **Modulo A** to work in Italy. Volunteer firefighter and first responder: my goal is to become a **rope rescue technician**. I'm building my experience at height right now, and I'm ready to build it anywhere.

CERTIFICATIONS	**IRATA Level 1 · Modulo A**
NEXT COURSE	**ITRA · 16–21 November 2026**

2021 – 2023	**Founder of a production studio** Magistral Studios · Lonigo

A solid place *to start.*

I don’t have rope access hours yet, but I have the right training to start safely: certifications to work at height and certifications to rescue. Copies available on request.

INTERNATIONAL CERTIFICATION

10 / 2026

IRATA Level 1

Rope Access Technician · trained by Sicurlive Group, assessed by an independent assessor.

ITALIAN REGULATION

2026

Modulo A

Rope work training required by Italian law (Legislative Decree 81/08, Annex XXI). It makes the IRATA certificate valid on Italian sites.

COMING UP

16-21 / 11 / 2026

ITRA course

International Technical Rescue Association · Level 2, possibly 3, with Prevent. The first step towards rope rescue.

TECHNICAL RESCUE

09 / 2026

Volunteer firefighter

Italian National Fire Corps · Verona

10 / 2025

High-risk worker training

4 + 12 hours · Legislative Decree 81/08

AERIAL INSPECTIONS

→ 11 / 2030

EASA drone pilot A1/A3

Open category · EU certificate

My goal: *rope rescue technician.*

I want to bring together the two things I do best: working on ropes and rescuing people. I’m already a volunteer firefighter and an ambulance first responder. From 16 to 21 November 2026 I’m taking the ITRA course (International Technical Rescue Association, Level 2, possibly 3) with Prevent, and more specialist courses are planned.

Specialising in rope rescue

WHAT I BRING FROM RESCUE WORK

- ABCDE approach to trauma patients
- CPR and early defibrillation, adult and paediatric
- Immobilisation, extrication and casualty transport
- S.T.A.R.T. triage and major incident management
- Coordination with dispatch centres and fire crews
- Composure, teamwork and quick decisions

On duty with the Italian Fire Corps (Verona), the Italian Red Cross (Vicenza) and Legnago Soccorso.

Experience at height: *to be built, anywhere.*

Let me be clear: I don't have work experience at height yet. I have the certifications, a first responder's training and the drive to gain experience wherever it's needed: construction and façades, industry, energy, in Italy and abroad, including long assignments. As an L1 I always work in a team, supervised by a Level 3 technician.

WHAT I CAN ALREADY DO — PHOTO · VIDEO · DRONE

Documentation from height

Before the ropes I worked as a photographer and videomaker for ten years, and I hold the EU drone pilot certificate (EASA A1/A3). At height I can document inspections, defects and progress with photos, video and aerial footage, ready for reports and clients.

IN A TEAM — RELIABLE

What I bring

Used to working in teams and under pressure: fire crews, ambulances, TV sets. Punctual, with ten years of self-employment.
